## MILITARY

### IDF – Nahal Unit

Combat Soldier | Reserve (since Oct 7, 2023)

# JUNIOR DATA ANALYST

SQL · Python · Power BI · Data Visualization · Digital Marketing

## PROFILE

Results-driven Data Analyst with a strong background in digital marketing and CRM. I turn raw data into actionable insights using SQL, Python, and Power BI. I learn by doing — end-to-end Poker/WSOP analysis pipeline, Solana trading bot, and business dashboards. Data Analyst Certification – John Bryce (May 2026). Ready to contribute from day one.

## PROFESSIONAL EXPERIENCE

### Digital Marketing & Data Specialist

Aug 2023 – Present

#### IsraLifeTV – Netanya, Israel

- Analyzed campaign performance (CTR, conversions, ROI) via Google Analytics and Data Studio — weekly reporting for management.
- Built Power BI dashboards to track marketing KPIs and identify optimization levers.
- Audience segmentation and behavioral analysis on Facebook & Instagram Ads to maximize ROAS.
- Collaborated with creative teams using data-driven insights to guide strategic decisions.

### Freelance Data & Marketing Specialist

2014 – 2023

#### I.Y. Market – Netanya, Israel

- Designed and executed digital strategies for 10+ clients — conversion data analysis and custom reporting.
- Extracted and processed campaign data to identify high-potential segments and optimize spend.
- SEO, SEM, and market positioning consulting based on competitive analysis and data trends.

### Sales Team Leader – Renewable Energy

2010 – 2013

#### Netanya, Israel

- Managed a 25-person team with implementation of performance tracking dashboards.
- Developed sales tracking systems to identify patterns and optimize team productivity.

## DATA PROJECTS

### Poker / WSOP Analysis Pipeline

SQL → Python → Power BI

End-to-end data pipeline on WSOP data: SQL extraction, Pandas cleaning, Seaborn visualizations, interactive Power BI dashboard. Identified winning patterns by player profile.

### Solana Trading Bot

Python · Jupiter API · Risk Management

Automated trading bot on the Solana blockchain with Jupiter integration, TP/SL management, market filters and real-time data processing. Advanced technical level.

### Data Analyst Portfolio

GitHub Pages · HTML/CSS

Live portfolio showcasing data projects with visualizations and documented source code.
